

Captains Report July

We are saddened to hear of the loss of one of our number Peter Emery C625 qualifying in Bristol in 1977 and interesting to read of Peters sporting life from David Ainsworth on the website.

Centurions have been to the fore in the past months in a vast array of events in todays sporting world and too many impressive performances to record all although be assured they do not go unnoticed, new Centurions have earned their badges in the recent qualifying events in Australia, The Netherlands and America and these are to be congratulated while remembering that it is the participation and shared goal that is the highest prize, we highlight to the Secretary the stirling work given by Centurions at the recent RWA 20Km event in judging and recording which they do week in week out we urge all to support at least once in a year.

We also report the demise of the CIU race walking club due to the affiliation fees required from UKA which are prohibitive for smaller clubs a sad end to a club that has produced a number of centurions.

In the coming months we will see our own Centurion race and we can report that all is reported in hand for the event from the organisers we urge support both on the track and supporting.
